

SYSTEM MANUAL

Visitor Pass & Letter Tracking System

A comprehensive, page-by-page operational guide and administrative documentation manual. Design systems, user-side submission procedures, and admin dashboards explained.

Manual Screenshot Placement Instructions

This manual contains formatted placeholder boxes. Once printed, open the application in your web browser, navigate to the corresponding page, capture a screenshot, crop the interface, and paste/insert it into the corresponding dashed container.

CLIENT / PORTAL NAME

Punit Joshi Office

SYSTEM VERSION

v1.2.0 (Stable)

GENERATED DATE

July 2026

TARGET ROLES

Admins & Operators

Access Control & Credentials Management

The system relies on a dual-role access control structure: **Administrator** and **General User**. Administrators handle system-wide data, calendar scheduling, letter processing, and operator accounts. General Users register visitors, submit letters, and request slots.

System Security Accounts Configuration

Credentials are authenticated using a three-tier model (super-admin hardcoded checks, allowed operators configurations, and database fallback credentials).

Role Account	Default Username	Default Password	Primary Access Permissions Scope
Super Admin	admin	admin123	Full system permission, create operator users, configure sub-permissions.
Sub Admin (Operator)	Dynamically Created	Assigned in Portal	Access to analytical dashboard, calendar, event requests, letters.
General User	user@gmail.com	123456	Submit visitors form, view submissions, add worker/letter, booking slots.

User Authentication Page (Route: /login)

The login screen validates user credentials against active user schemas and redirects to matching endpoints. Active sessions synchronize authorized route paths directly into local storage (allowedPages), which is verified by system middleware to reject unauthorized page requests.

PASTE / INSERT SCREENSHOT OF LOGIN PAGE HERE

URL: /login (Credentials inputs and Orange Sign In Button)

General User Home Page & Visitor Registration

1. User Landing Home Page (Route: [/](#))

The portal homepage features the profile card of **Punit Joshi**. It serves as the primary router, offering direct pathways for public visitors to launch the registration forms, and office personnel to access administrative consoles.

2. Visitor Registration Form (Route: [/form](#))

A premium, multi-step entry form that captures core visitor demographics, contact details, profile photograph, and detailed purpose selections. Field descriptions:

- **Full Name:** Complete name of the visitor.
- **Phone Number:** Verified contact line for notifications.
- **Age & Gender:** Personal demographic indicators.
- **Identity Reference:** Aadhar Number or Voter ID Card text.
- **Address details:** House number, village, landmark, and pin code.
- **Camera Capture:** Embeds an active webcam wrapper to capture a real-time photograph of the visitor.
- **Category Select:** Dynamically loads custom fields for 8 purposes.

PASTE / INSERT SCREENSHOT OF VISITOR REGISTRATION FORM HERE

URL: [/form](#) (Demographics form, Camera frame, and Purpose category select dropdown)

Visitor Form – Purpose Categories Guide

When registering a visitor under a specific category, the registration interface dynamically displays additional structured fields. This ensures all critical paperwork and tracking data are captured based on the intent of the visit.

Medical Purpose

Requires: Patient Name, Hospital Name, Tracking Doctor, and specific ailment/medical reason details.

Education Purpose

Requires: Student Name, Birth Date, Student Gender, Category (Castes), and a Student Profile Photograph upload.

Government Schemes

Requires: Scheme Name, Parent Status/Application Status, Apply Date, Marital Status, Category, and Aadhar details.

Business / Employment

Job: Position, Salary, Location. Business: Name, Industry Sector, Registration Number, GST Number, and Address.

Police / Legal

Requires: Application Number, Application Date, Place, Incident Details, Names Involved, Declaration, and Photo.

Infrastructure / Projects

Requires: Project Name, Location, Problem Description. Utility: Service Installation, Problem Statement details.

PASTE / INSERT SCREENSHOT OF CUSTOM PURPOSE FIELDS HERE

Example: Dynamic fields loaded when "Medical" or "Education" is selected in form.js

Visitor Submissions & Field Workers Registry

1. My Submissions Registry (Route: `/my-submissions`)

Operators can view their submitted visitor logs on this page. It shows an interactive list with visitor photos, names, phone numbers, and categories. A color-coded status badge highlights their progress: `Pending` (yellow) or `Completed` (green). Clicking a row opens a details modal with follow-up notes.

2. Workers Registry Grid View (Route: `/workers`)

This dashboard displays a list of booth/party workers registered under the operator's account. It organizes workers in a grid with cards showing their photo, first and last name, primary mobile number, designated position (e.g., Booth Head, Shakti Kendra Head), and designated area name or booth number.

PASTE / INSERT SCREENSHOT OF MY SUBMISSIONS & WORKERS PAGE HERE

URL: `/my-submissions` (Visitor records list) or `/workers` (Active party workers grid)

Worker Registration & Outward Correspondence

1. Register Worker Form (Route: [/addWorker](#))

Used by operators to add worker profiles. The form captures full address details (Taluka, Pincode), position, and designated booth. It also tracks family birthdates (Worker DOB, Spouse Name/DOB, Wedding Anniversary, Parents' Name/Anniversary) to coordinate greetings in the administrative schedule.

2. Outward Letters Registry (Route: [/letters](#) & [/addLetter](#))

Operators track outgoing letters/documents sent to government departments or organizations. The form requires an Inward Number, Subject, Recipient Name, Department, Assignee, and a scanned photo of the dispatch letter. The listing page shows outward dates and assignee paths.

PASTE / INSERT SCREENSHOT OF ADD WORKER OR LETTERS PAGE HERE

URL: [/addWorker](#) (Demographic & birth dates fields) or [/letters](#) (Outward letters grid)

Inward Correspondence & Saheb Slot Booking

1. Inward Letters Registry (Route: `/inward-letters` & `/addInwardLetter`)

Tracks correspondence received at the office. Operators input the Inward Date, Inward Number, Subject, Sender Name, assigned department, assigned staff member, and upload a document photo. The listing page shows status badges: `Pending`, `In Progress`, or `Completed`.

2. Saheb Slot Booking / Invitations Page (Route: `/invitations`)

Allows operators to request calendar slot bookings for meetings, community event inaugurations, or personal invitations for Saheb. Form inputs:

- **Event Name:** Title of the ceremony/meeting.
- **Date & Time:** Requested time slot of the event.
- **Organizer:** Requesting organization name.
- **Location:** Full venue details.
- **Reminders:** Checkboxes for automatic notifications.
- **Upload banner:** Upload invitation cards/posters.

PASTE / INSERT SCREENSHOT OF INWARD LETTERS & INVITATIONS PAGE HERE

URL: `/inward-letters` (Incoming mail tracking) or `/invitations` (Saheb Slot request form)

Admin Dashboard Portal Home Screen

The Administrative Dashboard (Route: `/admin`) serves as the control center of the application. It provides real-time tracking of visitor traffic, letter processing, and pending slot bookings.

1. Analytical Performance Indicators

The dashboard landing screen features five key metrics cards, each displaying total counts and active statuses:

- **Total Registered Visitors:** Total number of visitor forms logged since launch.
- **Active Party Workers:** Total registered booth and block party workers.
- **Outward Mail Logged:** Count of dispatched outward letters.
- **Inward Mail Received:** Count of received and assigned inward letters.
- **Saheb Event Requests:** Number of pending meeting invitation requests awaiting review.

2. Analytical Charts & Feed

Features responsive visual charts (visitor categories, letter progress percentages) and a live feed showing recent visitor arrivals with quick access to their details.

PASTE / INSERT SCREENSHOT OF ADMIN DASHBOARD MAIN PAGE HERE

URL: `/admin` (Metrics counters, charts widgets, and recent visitor logs feed)

Visitor Management Dashboard

The main database management page for visitors (Route: `/admin/visitorTable`) allows administrators to inspect, search, filter, update, and resolve visitor requests.

1. Core Administrative Operations

- **Full-text Search:** Search by visitor name, phone number, village, or purpose.
- **Interactive Details Drawer:** Displays the visitor's profile photo, Aadhar number, address, and purpose-specific fields.
- **Status Toggle:** Update registration status from `Pending` to `Completed` upon resolving the visitor's request.
- **Follow-Up Remarks:** Add detailed tracking notes to the visitor's record.
- **Edit & Delete:** Access edit forms or permanently delete records.

2. Purpose Categorization Filter

Allows quick filtering by purpose (Medical, Education, Scheme, Job, Business, Utility, Police, Project) and date ranges to streamline review workflows.

PASTE / INSERT SCREENSHOT OF ADMIN VISITOR TABLE SCREEN HERE

URL: `/admin/visitorTable` (Search filters, data rows, status options, and follow-up inputs)

Administrative Workers & Outward Letters

1. Worker Management Console (Route: `/admin/workers` & `/admin/addWorker`)

Provides full administrative control over the worker database. Administrators can search the registry, filter by position or designated booth, edit worker details (including demographic and family anniversary data), upload profile photos, and delete records.

2. Outward Letters registry Controller (Route: `/admin/letters` & `/admin/addLetter`)

Tracks outgoing mail registered by all operators. Displays dispatch photos, assigned staff, recipient departments, and next steps in a clean dashboard. Administrators can search entries and modify details.

PASTE / INSERT SCREENSHOT OF ADMIN WORKERS & LETTERS TABLE HERE

URL: `/admin/workers` (Worker profiles list) or `/admin/letters` (Outward correspondence list)

Inward Correspondence & Granular Access Control

1. Inward Letters Registry (Route: `/admin/inward-letters` & `/admin/addInwardLetter`)

Manages received mail. Administrators can view uploaded document photos, track action items, assign files to departments/staff, and update processing statuses (`Pending` , `In Progress` , or `Completed`).

2. Access & User Permissions Center (Route: `/admin/permissions`)

Secures the application. Super Admins can add operator accounts (Sub-Admins or Normal Users), set passwords, and assign page permissions via checkbox lists. This dynamically controls menu links and route access.

PASTE / INSERT SCREENSHOT OF ADMIN PERMISSIONS PAGE HERE

URL: `/admin/permissions` (Add user form, sub-admin tabs, and granular checkbox grid)

Administrative Calendar & Saheb Invitations Center

1. Administrative Schedule & Calendar (Route: </admin/calendar>)

Displays birthdays, anniversaries, to-do lists, and events in a monthly grid. Clicking a date opens a details drawer containing worker profiles and active schedules. Administrators can manage to-dos directly from the calendar.

2. Event Request approvals Center (Route: </admin/event-requests>)

Processes invitation requests. Highlights conflicts if multiple events occur on the same date. Administrators can approve or reject bookings (with remarks), configure reminders, upload invitations, and use a webcam module to capture invitation cards.

PASTE / INSERT SCREENSHOT OF ADMIN CALENDAR & EVENTS PAGE HERE

URL: </admin/calendar> (Monthly grid view) or </admin/event-requests> (Conflict alerts and approvals)
